

Open Donor: Artemus

### Staff impression

Artemus is very good looking. He has expressive large brown eyes and small dimples when he smiles. He has a medium skin tone that tans well and a clear complexion. He has a well defined chin, jaw line, and nice cheekbones. Artemus is naturally thin and enjoys playing sports like ultimate Frisbee and squash.

Outgoing, happy, passionate, and gregarious are perfect descriptors for Artemus. He always has a smile on his face and laughs easily. He loves having new topics to discuss and when he speaks he does so very animatedly. Artemus is also incredibly intelligent and is currently pursuing his PhD in computer science at a top university. He is an avid reader, particularly of the classics. We asked Artemus why he wanted to be a donor and he said, "I hope to help someone have a child, when they otherwise wouldn't be able to. I can imagine the pain of being unable to conceive a child on your own, and I am very happy that we live in a world where I can help others relieve that pain. I believe that someone who chooses me as a donor will be very happy with the choice. I also hope that one day, I'll be able to meet my recipient's child." We love Artemus and can't recommend him enough!
