

Casey Staff Impression

Casey is tall and lean, with a strong core and built up shoulders, arms, and leg muscles from competing in triathlons. His face is caring and bright, with handsome, green/brown eyes, an energetic smile, rosy cheeks, and a strong brow line. He has a fair skin tone, dark brown hair, and a bunch of fun freckles on his face and arms.

Casey is beyond charming. His intellect, wit, and amazing interpersonal skills make him one of the staff's absolute favorites to chat with. His personal accomplishments make him an undeniably great donor. He is a resident physician, currently specializing in Anesthesiology and Pain Medicine. Prior to his residency, he earned his MPH (Masters of Public Health), and, fueled by his passion for providing Global Health services, traveled to and lived in Africa for two years. In general, Casey is extremely well-traveled, and has an inspired world view from being a part of so many different cultures. He is also very musically inclined, coming from a family of singers, musicians, and performers- he has sung professionally for some time, as well as playing piano, sax, and jazz bass. There is much more we could say about Casey- suffice it to say, he would be an amazing choice for any family!
