

## Gus Staff Impression

Gus is especially muscular and athletic, with a strong, medium build and big arms. He has a rugged square jawline and face, with bright, blue/green eyes, light blonde hair, and a fair skin tone that has a light tan in the summer. He had quite the 'button nose' as a child, but has certainly grown in to it, and overall has a very attractive face and physique.

Gus, like many of our donors, is taking advantage of the great medical facilities in the area; he is currently working as a Medical Scribe and holds a Biochemistry and Neurobiology degree, with an ultimate goal to go back to school to become a M.D. and surgeon. In his spare time, he loves to stay active by weight lifting, running, hiking, and playing football. He also plays drums and loves spending time with his immediate family, all of whom are still especially close. Gus is a great guy with a terrific drive and ambition!
