

Sonny Staff Impression

Sonny is tall and has a long, lean build. He has predominately Asian facial features from his mother's side, including handsome dark, almond eyes, a smooth, tan complexion, and thick black hair. He has a long, oval face and an awesome smile.

Sonny is an all-around great combination of smart, creative, and caring. He is currently in school getting his PhD in Organic Chemistry, and also teaches chemistry classes at his university. He has a lot of creative and mechanical hobbies that he inherited from his family, including auto and motorcycle repair, latch work, and needlepoint. He is self-described as a compassionate, supportive individual who keeps a very close inner circle of friends and loved ones. We think Sonny is a truly fantastic donor!
