

Open Donor: Payton

Staff impression:

Payton has light captivating blue eyes and curly sandy blonde hair. We joke around at the lab that he is our resident Ken doll! He has chiseled features, full lips, and a flawless complexion.

He is not only extremely adorable but has a sparkling personality and truly is a resident favorite. He is kind, outgoing, caring, upbeat, and happy. He has a beautiful smile with perfect white teeth and a dimple on the left side of his cheek.

When we asked Payton why he wanted to become a donor his response was, "I believe strongly in the value of the family and wish to contribute to people who genuinely want to become parents and are willing to go through such great lengths to have a family."
