

Kingston is slim with dark features and wavy hair. His face is square with full brows, almond-shaped eyes, a gently rounded nose, and full lips. His athleticism is evident as he is strong swimmer who has also participated in quite a large variety of sports.

Kingston is well-educated and is a life-long learner who wants to master everything. He spends much of his time tinkering, building and problem-solving. He is a jack-of-all-trades who gets things done! He is optimistic and caring, he visits our office with cheerful and kind words for our staff. His family stays in frequent contact with each other and he hopes to have children of his own. We are thrilled to have such a great guy as a donor!
