

Staff Impression – Waylon 12102

Waylon steps into our office with a silly but serious personality. His sense of humor and laid-back attitude pair well with his extreme intelligence. Waylon is a highly accredited cancer doctor who is well traveled and has a large amount of life experience under his belt. Waylon has a tall, athletic frame. His light sandy brown hair and blue eyes match well with his fair western European skin tone. His large eyes, and full smile make for an attractive man.

On top of being a medical doctor, and a father, Waylon is very athletic and loves to spend his time outside. Playing soccer regularly and chasing after his 1-year old son helps keep him in great physical shape. If you are looking for a highly educated donor with a zest for life, Waylon may be the perfect match for you!
