

Flynn Staff Impression

Flynn is a gregarious, jovial donor who always brings an infectious positive attitude when he visits our clinic. Dark hair frames Flynn's square face with large brown eyes, a narrow nose, and a warm, full smile. He has an average build and an enviously high metabolism.

Flynn is very genuine, inquisitive, and caring. He's also truly got the gift of gab, and speaking with him always brings levity and laughs to the workday. He is family focused and keeps high moral standards he balances with open-mindedness and a forward way of thinking. His future plans are to continue working with healthcare and spending quality time traveling with a family of his own.
