

Artem Staff Impression

Artem is 5ft 10 with blond hair and blue eyes. Both of his parents are from Ukraine and taught him and his sister the value of hard work and integrity. Artem is currently working hard on a degree in Molecular Biology and has plans to be a medical doctor. When he is not doing schoolwork or hanging out with his friends, he enjoys reading medical biographies to enhance his knowledge and personal connection to the health field.

Artem has strong family values and hopes to help another couple or single parent by choice build their family. We are so lucky to have a bright, kind, well rounded donor like Artem in our donor program!
