

Sixten (12679) Staff Impression

Sixten is a handsome donor with light blonde hair, fair skin, and rosy cheeks. He has a rectangular face with angular features such as a well-defined, square jawline, and pointed chin. His features are very symmetrical and proportionate with a medium-sized, rounded nose, full lips, and tidy brows. He has broad shoulders and a lean muscular build from regular weightlifting, running, swimming, and being active in the great outdoors.

Sixten has a calm and thoughtful personality, and he is a great listener and supportive friend. He is very intelligent, analytical, and well-organized but also creative, funny, and adventurous. He credits his family for passing on a love for travel with lots of exciting vacations growing up that involves plenty of boating, snorkeling, and quality time together. Becoming a godfather to a child conceived through IVF inspired Sixten to help others have children by becoming a sperm donor. We think he is a great well-rounded, and caring guy who is a great donor option, and we are glad to have him in our program!
