

Ogden Staff Impression

Ogden is a wonderfully eclectic, personable, ambitious and thoughtful addition to our donor program. He allows his personality to shine and his natural leadership qualities to help him succeed in multiple areas of his life. Having completed his education obtaining a Geology B.S. / Geospatial Science Post Graduate Certificate he currently works as a data mapping technician and finds it greatly fulfilling and challenging. An avid rock climber and explorer, Ogden has traveled around the globe to the likes of Spain, Colombia, Mexico, Italy and more, and surrounded himself in nature and culture. He is a natural outdoorsman and prides himself on his survival skills learned at a young age and honed through adulthood.

Standing at just under 6ft, Ogden has a lean, athletic frame, gained from years of rock climbing, swimming, biking and even the occasional half marathon and a sprint triathlon. He has large ocean blue eyes, complimented by his tan complexion and wavy blonde hair. He has a slightly hooked nose and adorable chin dimple. Ogden has thinner lips, straight white teeth and a contagious smile. We are excited to have him in the program and know he is an excellent choice for those searching for their donor.
