

## **Kestrel 16009**

Kestrel is warm, intelligent, witty, and a real gem! He has striking green eyes and long eyelashes, as well as a complimenting olive skin tone and reddish-brown hair. We were so impressed to hear that Kestrel recently completed his master's degree in Game Arts and Engineering. Amazingly, he has already founded his own company. It goes without saying how much he enjoys the gaming industry and culture; he hopes to pursue a career in game development.

In his free time, it is not a surprise that Kestrel enjoys all things gaming, however, we admire his vast range of artistic talent. In addition to engineering, he enjoys painting, welding, and sculpture making. Kestrel's optimism lights up a room, and he is a joy to be around. We recommend him to any family!
