

Open Donor: William

### Staff impression

William's intelligent appearance is complimented by his rounded features and rosy red cheeks. He has a medium skin tone that tans nicely in the summer. He has a fantastic smile, and clear blue eyes that are crescent shaped and crinkle around the edges when he laughs. William has light brown hair that was bright blonde when he was younger. He dresses sharply in buttoned up short sleeved shirts and khaki's. William describes his personality as "easy-going, funny, inquisitive, curious, open-minded, and goal-oriented. I enjoy taking on new challenges and pushing myself to limits that I didn't know existed. I try to carry a positive, optimistic mentality about myself and others."

William is very intelligent and witty. He is laid back but intensely curious about the world around him. He is ambitious and wants to help others reach their goals. He enjoys cooking, drawing, reading, and being in the great outdoors. We asked William why he wanted to be a donor and he said, "I want to be a donor because I feel it makes a world of difference to someone on the other end. It requires minimal effort on my part, but yields one of the most joyous presents we can ever receive, I feel everyone, regardless of sexual preference or fertility, should have the option to raise a child." We think William is truly an amazing person and highly recommend him for your family.
